1902 County Surveyor's Record Book 1, page 29, and Record Book A, Map No. 41, contains a survey of Section 11 by John E. Whilt. This corner is shown at the lost position with 20.33 1/4 chains (1341.95 feet) per 40 acres or 81.33 chains (5367.78 feet) for the east line.

1930 County Engineer's Notebook No. 58 shows road survey by H. G. Elletson running north to south. Corner is not shown but stationing shows east-west 1/4 line fence at 2679.1 feet to the NE corner and 2674.4 feet to the SE corner.

2002 On November 5, 2002 Westwood Professional Services, Inc. searched the corner area, but found no evidence of a corner or ties. We measured 5355.04 feet between section corners, which compared well with the Whilt's survey of 81.33 chains (5367.78 feet). Since Whilt established the corner lost in 1902 we set an iron capped #12684 at the lost position and established reference ties. The corner is set at 1338.76 feet per 40 acres.
