1880 County Surveyor's Record Book 2, page 309, shows a road survey by Frank Sanders. Ran road survey from South 1/4 corner of Section 18 north to 1/4 post at North 1/4 corner of Section 18 with a distance of 80.40 chains.

2008 Ben O'Malley performed a survey in Section 7 of Township 38 North, Range 28 West and set an iron pipe capped RLS 42300 at a 3-way fence corner to mark the corner position.

2010 The Benton County Surveyor's Office found the 1/2" iron pipe capped RLS 42300 from 2008 on an east-west fence and fence to the north. The position falls approximately 9 feet north of a straight line between section corners. The iron pipe measures 2623.03 feet to the northeast corner and 2326.76 to the northwest corner of Section 18 and fits a split of the distances at the east sixteenth to a fence south within a foot. The distance south measures approximately 40 feet long of the 1880 distance, though a measurement index to Mr. Sanders is unknown and the iron pipe falls on the extension of the north-south centerline. No additional information was found at the 1880 resurvey distance. Since the found iron pipe fits line between section corners within 9 feet, the long-standing fences east-west and north, the GLO distance to the east within 17 feet, a split of the fences at the east sixteenth and the extension of the fence to the south, it is accepted as marking the obliterated corner position.
